Accelerating Protection for Kauri

Purpose is to accelerate protection for kauri by:

Refreshing direction of
2014 strategy

Establishing a nationally
coordinated, long-term
approach to the management
of kauri dieback disease

Accelerating change –
looking at new
arrangements and driving
critical improvements

Drivers for change:

- Implementing the Ministers' decisions
- Evidence of disease spread and low levels of compliance
- Strategy due for review
- Agreement that changes are needed – the current model isn't delivering sufficient protection

"An NPMP shows how serious we are about protecting kauri. It is by far the strongest piece of regulation available and will ensure mandatory hygiene practices, consistent regulations that apply nationally, stronger governance and access to funding."

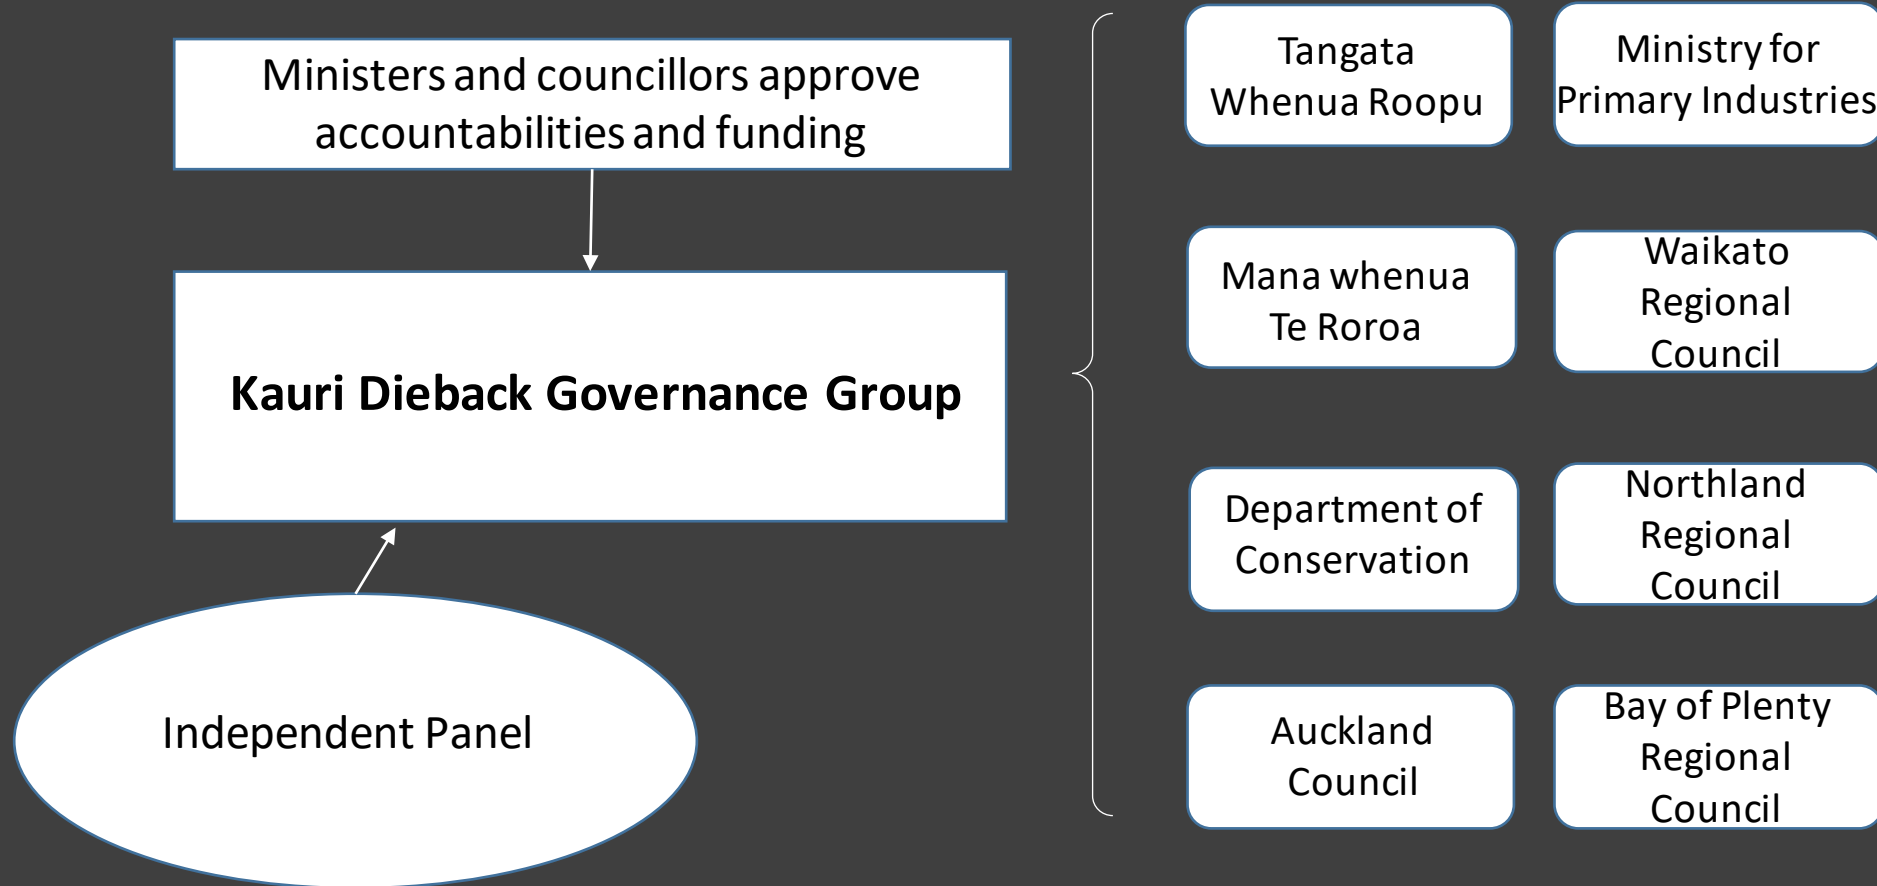

Hon. Ministers for Biosecurity and Conservation,
O'Connor and Sage

Who is involved and decision making

What is this consultation about?

The purpose is to:

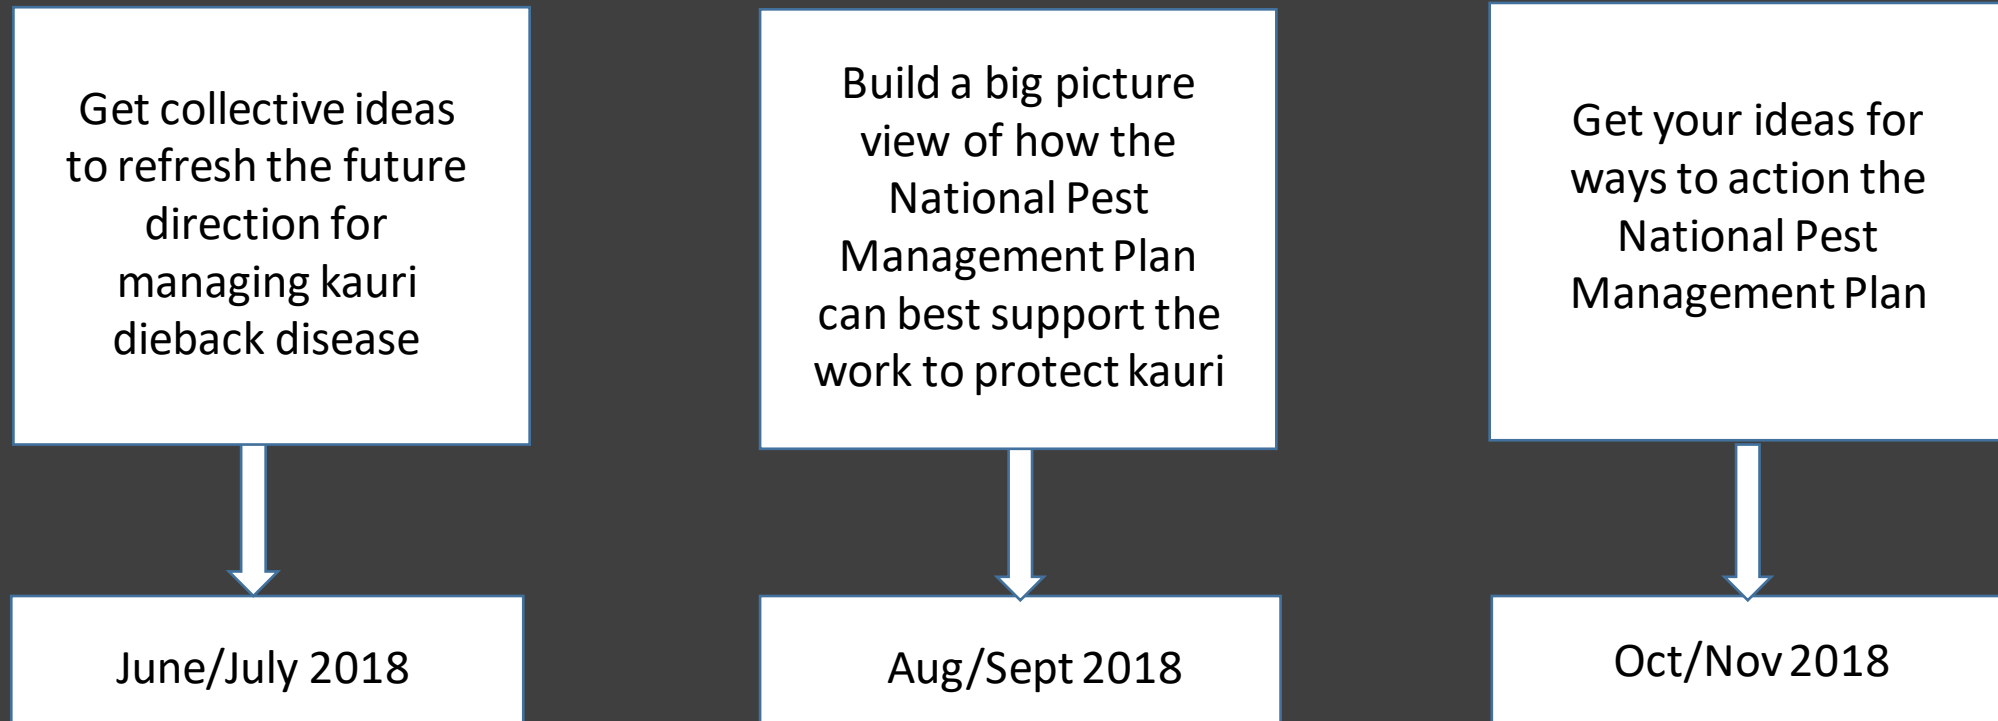

- Build on what is already known and reset the direction for managing kauri dieback disease
- Work together and develop actions to protect kauri for the future

The outcome will be:

- A refreshed strategy setting out the direction for managing kauri dieback disease
- A big picture view which will inform how the National Pest Management Plan can best support the work to protect kauri

Vision of the Kauri Dieback Programme

**Ko te kauri he whakaruruhau
mō te iwi katoa**

The kauri is a shelter for all peoples

Kia toi tū he whenua

So that the land is restored

Kia toi tū he kauri

So that the kauri stands proud

By 2024, the mauri and integrity of kauri forests are sustained in the presence of PTA; we understand the disease; and tangata whenua, communities and stakeholders are all active in the management of kauri dieback.

Kauri dieback management outcomes:

- Maintaining currently kauri dieback-free areas
- Significantly reducing the spread of kauri dieback
- Significantly reducing the impact of kauri dieback within infected sites
- Protecting iconic individual kauri trees and stands from PA
- Maintaining effective working relationships between the Crown, tangata whenua and regional authorities, and increasing public participation in the management of kauri dieback

Goals:

- Engaging and enabling people and communities
- Delivering effective operations
- Building knowledge and tools
- Effectively managing the programme

HAVE YOUR SAY

What happens next?

Round one (25th June - 16th July): Developing the future direction for managing kauri dieback disease

Round two (August/September 2018): What could the National Pest Management Plan look like?

Round three (October/November 2018): Ways to action the National Pest Management Plan

ROUND ONE

Round one will help get the big picture view for managing kauri dieback disease. It will inform how the National Pest Management Plan can best support the work to protect kauri.

ROUND TWO

Round two will be where you can tell us your ideas on what could be in the National Pest Management Plan.

ROUND THREE

In round three you can have your say on ways to action the plan. Timing for these consultations is indicative and will be firmed up soon.
